**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. **PCT/EP 03/07575**

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, Pages

1-23 as originally filed

Claims, Numbers

1-16 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
 - ☐ the language of publication of the international application (under Rule 48.3(b)).
 - ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).
3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:
- ☐ contained in the international application in written form.
 - ☐ filed together with the international application in computer readable form.
 - ☐ furnished subsequently to this Authority in written form.
 - ☐ furnished subsequently to this Authority in computer readable form.
 - ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
 - ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

SECTION V

1). Relevant prior art is represented by:

2). The claimed matter is novel in view of the disclosure of D1 (see page 498, top of the page), since the formic anhydride used in D1 is the acetic formic anhydride. This compound does not fall within the scope claimed by the applicant in claim 1 for the values of R^3 .

3). D1 represents thus the closest prior art.

The problem underlying the current application appears to be the provision of a further process to make available compounds of formula (I).

In view of the data provided by the applicant, this problem is considered as being solved.

Nothing in D1 would give the skilled person a hint to use another formic anhydride as the one used in D1 to arrive at the same compounds.

However, if as shown by the applicant, this approach is not obvious, it remains questionable whether the skilled person would expect that the reaction takes place for whole the claimed values of the groups R^3 knowing that the replacement of an acetyl

group by a propyl group leads to an unexpected result.

In other words, if the skilled person would not arrive at the claimed process starting from D1 in an obvious manner, then for which reasons the same skilled person would consider the claimed generalisation as obvious.

An inventive step on the whole claimed scope cannot be acknowledged.

4). There is no objection with regard to industrial applicability.
